

PARTNERSHIP JOURNEY AT A GLANCE

EXECUTIVE SUMMARY

This timeline chronicles the Recast-Insight partnership journey from initial discovery through active Premier partner onboarding. The relationship has progressed through eleven major touchpoints across six months, culminating in Insight receiving the 5th and final North America Premier Partner slot with a structured 4-week proof-of-concept and a \$600K Year 1 commercial floor.

Engagement Span	October 24, 2025 to April 2026 (6+ months)
Recorded Touchpoints	11 major meetings / strategic sessions
Primary Workstream	Application Workspace integration into Insight Managed Endpoint 2.0
Partnership Tier	Premier (5th and final NA slot - invite-only)
Year 1 Commercial Floor	\$600K licensing (vs. standard \$1M threshold)
Ramp Proposal	Year 1: \$600K -> Year 2: \$1M -> Year 3: \$1.5M
Current Status	4-week POC kicking off; business justification track parallel
Flagship Account	UnitedHealth Group (UHG) - 4,000+ apps, 300K endpoints

PHASE 1: DISCOVERY | OCTOBER 24 - OCTOBER 30, 2025

Oct 24, 2025

Initial Discovery Call - First Contact

- Adam Duffy initiated interest after hearing Recast's name 'in circles' internally (referenced by Joe Flynn).
- Primary focus:** third-party app patching as a Managed Endpoint add-on.
- Recast positioned Application Workspace: 8,000+ app catalog, multi-tenant, cross-platform (Windows/ARM/Mac).
- Efficiency claims:** packaging time 8hrs to 2hrs; 9 min/user/month ticket savings (Citibank: 13 min).
- Zero-day handling, scoping difficulty, and packaging-vs-patching distinction flagged as Insight's key questions.
- ✓ **Outcome:** Technical demo scheduled Oct 29; Partner discussion scheduled Oct 30.

Oct 29, 2025

Technical Deep Dive Demo (1h 31m)

- Full demo of Launcher Tool, Smart Icons, Offline Mode, Autopilot integration (removes 10-app limit).
- Catalog confirmed:** 4,377 Windows + 1,727 macOS apps (~7,700 total, 2,300 unique titles).
- v4.4 (Nov 2025) adds OData feed + Power BI template; integrates with Sentinel/Splunk.
- Joseph Flynn most engaged participant** (~60% of Insight talk time) - deep technical questions on scale, ARM/Qualcomm, reporting APIs.
- MSP capabilities: multi-tenant portal, virtualization connectors (Horizon, AVD, Citrix, Dizzion, Frame).
- ✓ **Outcome:** Shared pain points surfaced: packaging delays, Mac-via-Intune problems, license visibility gaps.

Oct 30, 2025

Partnership Discussion + Internal Business Plan Drafted

- Insight org structure confirmed:** 3 divisions (Device, Infrastructure, Microsoft+ ~\$2B); CoE led by Joe Flynn.
- Scale:** 40,000+ customers, 1.2M devices configured/year, 300K managed endpoints, 12-20% YoY growth target.
- Two partnership models proposed: **MSP (white-label)** vs. **Premier (co-branded 'powered by Recast')**.
- UHG identified as flagship:** 4,000+ homegrown apps, 90% remote, 4-hour deployment cycles, SLA-breaking.
- Revenue target framing: \$2-5M annual licensing + 10x services multiplier (~\$200M+).
- ✓ **Outcome:** Internal Business Plan drafted by Aaron (UHG pilot -> MSP-first -> Premier later); company profile written.

PHASE 2: EVALUATION | NOVEMBER 2025 - JANUARY 2026

Nov 14, 2025

Partnership Scope & Engagement Model

- Insight confirmed interest in **both MSP and services/project delivery models** - NOT transactional reselling.
- Revenue expectations set:** only interested if partnership drives ~\$10-15M+ licensing with 4-5x services attach (\$50M-\$100M services).
- Deal protection: strict registration, partner-first GTM, ~3% margin cap for competing partners on registered deals.
- Testing required in 2 tenants; Keith & Murphy identified as testers.
- GTM disagreement: Recast proposed mini-webinar (1-5 customers); Insight pushed back due to long sales cycles.
- ✓ **Outcome:** Follow-up scheduled November 21, 2025.

Dec 5, 2025

Partnership Acceleration Briefing (Aaron's Internal Doc)

- Formal 4-phase partnership roadmap drafted to accelerate technical validation ahead of Insight's Amplify event.
- Phase 1 (Dec 2025):** Environment provisioning + 60-min onboarding Dec 15, 1 PM CT; Keith + Murphy as admins.
- Phase 2 (Late Dec - Jan):** Exploratory testing during holidays.
- Phase 3 (Late Jan - Early Feb):** Amplify event (Jan 26-28) + 30-day formal beta assessment.
- Phase 4 (Mid-Feb):** Re-convergence week of Feb 14; final decision target late February 2026.
- ✓ **Outcome:** Target: Reduce manual app lifecycle work from 60% to ~20%; enable 80 engineers to function like 140.

Dec 19, 2025

Managed Services Operating Model Discussion

- Insight relaunching Managed Endpoint service in 2026 - plan already built.
- Adam expected simple third-party patching add-on but recognized Recast goes beyond, requiring service redesign.
- Requested:** feature -> outcome -> activities replaced -> time/cost impact breakdown.
- Aaron positioned Application Workspace as middle layer (SCCM, Intune, Citrix, Azure) - apps 'follow the user.'
- Citrix narrative shared:** ~30% renewal increases over 18 months; real issue is app change capacity, not Citrix vs AVD.
- Two ROI buckets agreed: Exec (IT capacity, risk, talent) + IT Ops (delivery, ticket churn, migrations, burnout).

Jan 16, 2026

Aaron + Adam - Pricing Tiers & Strategy

- Two engagement models formalized:** Model A (Managed Service - 'nirvana') vs. Model B (Enablement/Advisor - entry point).
- Licensing structure identical across both models.
- Key metric:** ~20% reduction in L1 to L3 escalations. Scale goal: 80 engineers functioning like 140.
- DoorDash analogy:** backend providers change, frontend stays consistent for users.
- Pricing per-user; includes 7,700+ apps, custom app support, automated updates; optional +20% premium support.
- Pricing tiers requested:** 500 / 1K / 3K / 5K / 10K / 15K / 25K / 50K / 100K / 250K users.
- Realistic rollout timeline: H2 2026, potentially Q4.

PHASE 3: NEGOTIATION | FEBRUARY - MARCH 2026

Feb 27, 2026

ROI Documentation & Manual Packaging Breakthrough

- Recast shared existing ROI/business case document + SCCM-to-Intune migration case study.
- Pain points:** 5-12 day 'Intune time,' device-based deployment limits, duplicate packaging (Cloud PC/AVD/Mac).
- American Financial example:** 7-12 day Intune cycles spiking support tickets.
- KEY DISCOVERY:** Partner identified manual packaging of non-catalog apps as highest-value use case - previously unaware.
- First packaging manual; every subsequent update automated. For MSPs: custom packages reusable across customers.
- Two impact pillars: (1) speed - reduced repackaging, (2) end-user experience - single pane, fewer tickets.
- Partner confirmed preference for transparent '**powered by Recast**' branding.
- ✓ **Outcome:** Inflection point - manual packaging automation identified as unique differentiator driving partnership viability.

Mar 6, 2026

Citrix Pricing, AI Budgets & Managed Endpoint 2.0

- Citrix price increases ~30-40%** driving dissatisfaction; healthcare example: 3,000-employee org projected ~\$3.2M annual savings.
- Enterprise budget reality: only 2 categories getting funded - cost displacement and AI initiatives.
- RAM cost spike:** 64GB now ~\$600 vs ~\$200 historically - forcing services spend reduction.
- Managed Endpoint 2.0 launch target:** no later than mid-Q2 2026; ARB approval required.
- Pricing: manual packaging ~\$8/device/month (3K devices); Application Workspace ~\$2/user/month at 3K; \$0.41-\$0.61 at 50K scale.
- Current endpoint footprint under management: ~200K devices.

Mar 23, 2026

Deep Demo Call - Insight Technical Team

- Second full technical demo: architecture, multi-tenant, end-user experience, business case.
- Value prop: Speed / Scale / Risk Reduction - 'Apple-like user experience.'
- Lightweight agent (~2.5 MB), port 443, native app install (not virtualized), workflow-based execution.
- Integrations confirmed: Entra ID, Citrix/AVD/SCCM, SIEM (Splunk), Okta.
- Limitations acknowledged: paywalled apps must be manually retrieved; ARM works but not fully native.
- Attendees:** Aaron, Nico Zik (Recast Dir of SE); Adam, John Murphy, Don Sorcinelli, Keith Boesel, Anna, Eric Moore, Kris Huff.

Mar 27, 2026

TWO Meetings - Commercial Alignment

- Meeting A - MEP 2.0 Bundle: UEM + DEX (Nexthink) + L2 Support + Governance + Application Workspace.
- Pricing example at 1,000 devices: ~\$9.47 PDPM all-in; full bundle at scale ~\$5.40/user/month.
- Application Workspace modeled at ~\$2-2.30 cost component (~\$1 license + ~\$1-1.30 labor).
- Recast value strongest in multi-environment enterprises - NOT SMB or single-environment.
- Meeting B - Partnership Structure: Recast's 3-tier program revealed (Authorized / Opportunistic / Strategic).
- Strategic tier: ~5 partners max, 75% licensing discount, \$5M+ annual target.
- Proposed Insight ramp: Year 1 ~50K users (~\$600K) -> Year 2 ~\$1M -> Year 3 ~\$1.5M.
- Ticket reduction modeling: 33K app-related tickets/year -> ~80% reduction potential.
- ✓ Outcome: Ramp viewed as 'very palatable' internally; biweekly cadence confirmed.

PHASE 4: COMMITMENT | APRIL 2026

Apr 2026

Premier Partnership Discussion - POC Kickoff

- Premier Tier scope: 5th and final NA Premier slot (invite-only); deepest licensing discount, named engineer (John Yoakum), full sandbox/POC, partner-of-record protection.
- Year 1 commitment: Standard Premier threshold is \$1M; Aaron confirmed approval to set Insight at \$600K.
- True-up cadence flexible: 6- or 12-month cycles; Recast open to extended ramp window.
- Margin structure: Tiered net-new margin (~25% / 15% / 5% off MSRP) - licensing only, no downstream pricing restrictions.
- Services lane open: Recast doesn't deliver pro services; inbound routed to Premier partners (attached-services opportunity).
- Two parallel workstreams: (1) Recast stands up test environment; (2) business justification resumes when Adam returns.
- Technical evaluation: 4-week partner POC with weekly 90-min enablement sessions led by John Yoakum.
- Constraint raised: Insight does NOT transact licensing for ISP clients - narrows addressable revenue base.
- ✓ Outcome: Anna delivered admin user + named testers same-day (ahead of Friday target); POC kickoff scheduled.

CURRENT STATUS TRACKER | AS OF APRIL 23, 2026

INSIGHT - APPLICATION WORKSPACE PARTNERSHIP

Item	Status	Detail
Discovery	✓ Completed	Insight org, scale, pain points, and UHG flagship opportunity confirmed (Oct 24-30, 2025).
Technical Demo	✓ Completed	Two full demos delivered (Oct 29, 2025 + Mar 23, 2026); Insight technical team fully briefed.
Business Case / ROI	✓ Completed	ROI document + SCCM-to-Intune case study shared; manual packaging breakthrough identified (Feb 27).
Commercial Model	✓ Completed	3-tier partner structure revealed; Premier slot confirmed; \$600K Year 1 floor approved.
Ramp Proposal	✓ Completed	\$600K to \$1M to \$1.5M over 3 years; 'very palatable' internally at Insight.
Partner Test Environment	■ In Progress	Aaron coordinating with John Yoakum to stand up immediately; admin + testers confirmed.
4-Week POC	■ Next	Kickoff scheduled (Mon 1:30 PM CT or Tue 3 PM CT); weekly 90-min enablement with John Yoakum.
Business Justification Session	■ Next	Resumes when Adam returns from travel (~2 weeks); Aaron preparing Premier partner modules.
Contract Execution	■ Planned	Pending POC outcome + internal security review + BMO recommendation from Anna/Adam.
UHG Flagship Pilot	■ Planned	Flagship proof-of-value account; targets 2-3 homegrown apps across ~2,000 endpoints post-contract.
MEP 2.0 Integration	■ Planned	Insight launching MEP 2.0 no later than mid-Q2 2026; ARB approval required; Application Workspace as core component TBD.

KEY STAKEHOLDERS

Name	Title / Role	Company	Role in Partnership
Aaron Adsit	VP / Head, Partnerships & Alliances	Recast	Primary partnership lead; author of business plan, ramp model, and POC coordination
Anna Donnelly	Director, Services Product Strategy & GTM (CoE)	Insight	Executive sponsor on commercial side; validates internally with BMOs
Adam Duffy	Product Manager, Managed Endpoint & Device Lifecycle	Insight	Primary product/technical lead; owns MEP 2.0 design; leads business justification
Joe Flynn	Modern Workplace Director, Distinguished Technologist (Head of CoE)	Insight	Most technically engaged at Oct 29 demo (~60% of Insight talk time); approval authority
Keith Boesel	Solutions Architect, Devices CoE	Insight	Named POC tester; technical evaluator
John Murphy	Systems Management Lead (SCCM/Intune)	Insight	Named POC tester; deep SCCM/Intune expertise
Don Sorcinelli	Technical (role not specified)	Insight	POC tester; Mar 23 deep demo attendee
Eric Moore	Technical (role not specified)	Insight	POC tester; Mar 23 deep demo attendee
Kris Huff	Technical (role not specified)	Insight	POC tester; Mar 23 deep demo attendee
John Yoakum	Technical Relationship Manager	Recast	Named Premier engineer; leads 4-week POC enablement
Nico Zik	Director of Solutions Engineering	Recast	Mar 23 deep demo lead
Gary	Head of Market Development Executives	Insight	Referenced - leads MDE team

The Insight partnership has progressed from first-contact discovery in October 2025 to active Premier partner onboarding in April 2026 - a six-month arc marked by three inflection points: the UHG flagship identification (Oct 30), the manual packaging breakthrough (Feb 27), and the Premier slot offer (April). The relationship is now structurally committed on both sides, with a 4-week POC in flight, \$600K Year 1 floor approved, and a \$600K to \$1M to \$1.5M three-year ramp accepted in principle. Remaining risk sits in internal Insight approval cycles (BMO review, security review) and POC technical validation - not commercial alignment.
